

PRESS RELEASE

November 4, 2022

Housatonic Water Works Company, Inc. (HWWC) has announced its second informational meeting for calendar year 2022 is scheduled for November 15, 2022 at 6:00 P.M. via Zoom.

The company's engineer, Robert Ferrari of Northeast Water Solutions will detail the results of the GreensandPlus filtration pilot study that was conducted in September. The pilot study is a small scale version of the treatment equipment that the company seeks to use to remove manganese.

Included an evaluation is a study of factors affecting the formation of disinfection byproducts including Haloacetic acids which are a family of chemicals formed when disinfectants such as chlorine used to kill viruses and bacteria in community water supplies react with naturally occurring organic matter and other substances in the source water.

This meeting offers an opportunity for our customers to see what we are doing to address these problems and ask questions and we encourage all customers to attend.
